Leading in water supply

The business field of KWT GmbH is manufacturing high-quality PP-R and PP-RCT piping systems designed for potable hot and cold water applications as well as industrial applications under the brand name K-Aqua.

KWT GmbH was founded in 2014 as independent unit on behalf of the premium manufacturer KESSEL AG, the market leader in the field of drainage.

KWT GmbH, Waldsolms-Brandobrendorf, Germany

Material and quality

Plastic pipes made from PP-R (Polypropylene Random Copolymer) were introduced more than 30 years ago. Since then, they have been used mainly for hot and cold water pipe systems and have significantly contributed to the growth and acceptance of plastic pipes for plumbing and heating systems.

Benefits of PP-R/PP-RCT piping systems:

- no corrosion
- high environmental properties
- limited heat loss
- excellent welding properties
- lower noise operation
- fast and easy installation
- good chemical resistance
- taste and odour neutral
